Irresistibly tactile

Warmly welcoming, Craggan Flax is a textile to make any interior feel like home. Deeply textured and thickly woven, it effortlessly blends comfort with style to bring irresistible tactility and visual detail to both task and soft seating. Crafted from a blend of wool and flax, this sustainable fabric retains the raw appeal of its natural composition, whilst possessing the contemporary aesthetic and stylised texture of a chunky weave.

Natural composition, commercial performance

An updated twist on a Camira classic, Craggan Flax embraces the all-natural credentials of its pure wool predecessor, while also incorporating the innate performance properties of bast fibers. Woven from a wool and flax blend, it is classified for heavy duty upholstery use and also achieves SCS Indoor Advantage Gold, certifying compliance with rigorous indoor air quality emission requirements.

Complex construction

Deceptively simple, the beauty of Craggan Flax is held in its delicate detail, with each colorway enhanced by a subtle highlight shade that sits quietly in the background of the chunky weave. This visual intrigue is further heightened by the inclusion of flax, which creates an exquisite two-tone effect once the fabric has been dyed.

Neutrals and brights

With a color palette that tells two stories, Craggan Flax is available in a range of neutral and bright tones. Refined to 15 considered colorways, this versatile selection of shades can be balanced, blended or used in isolation to create an upholstery scheme that is perfect for your interior.
